Descriptive

One of the most important issues in UAE is Education, ^{which is} UAE education is ^{more} different ^{educational} system from any other systems. UAE system education has four stages. The first stage is preschool, which children start from 5 years to 7 years. In this stage, they start to learn how to be respectful in class. Teachers start to teach the children how to read, write and paint. And also, teachers teach children what's right and wrong. The second stage is primary school, children start from 8 years to 15 years old. Here teachers teach students how to participate in class, how to do homework and how to behave. The third stage is secondary school. Students who are from 15 to 18 years old start to study all subjects and do many activities. The final stage is college or university. Here students study broad subjects that help them to provide high performance and have lots of knowledge. This system built by president Zayed and it started in 1974. He spent lot of money on this system to provide best performance that helps students to learn faster. They are ten subjects that students study in this system, and one of them is English. Children study English because when they finish study from high school they can use English as benefit to study outside after they finish high school.

Expository

UAE system education is one of the best systems in the world that helps students.

This system got the best system in 2009 that teach education almost perfectly. There are three sub points that UAE system education became the best famous systems in the world.

First, how was system education built? UAE system education began in 2000 and it was famous at that time because it was new and no one supports it at the first time.

After a while, one of the president brothers studied in this system and it showed good results for him. So, He gave them money and everything that can support this system.

After a while, this system become the best and the famous systems in the world. The

second point is how this system works. This system has many ways to teach students.

There are organizations that help students to make his way to the top easily such students

meeting, how to help students and many other organizations. And there are many

activities that students need for their studies such sports, paints and many other activities.

The third point is the result of this education. The result of it is that students have lots of

knowledge about organizations, activities and studies and many others. And also, there

will be good students will high skills of studies and physical things. As a result of the

three points, UAE system education known as the best education that many people wish

to have it.

-topic sentence is clear,
but generalizations
that support it are not
clear.
